

Cycling

New Mini Roads session for balance bikes started in the day

Quiter time expected for a while as we are in a very cold period and the usage will be affected

So we use this as a time of planning and administration, Grants, timetables, budgets and planned reviews.

Football

Grass football is going through a rough patch with frozen pitches and very wet spells so games getting called off and this will lower café income too.

The 3G usage can't get any more on evenings and weekends so we are looking at funding to work towards a second 3G with supporting infrastructure of changing rooms and car parking.

Andrew Briggs and Matt Gleed have passed Grounds Maintenance certifications which will allow us to draw funding for Grass Pitch renovations across the Parish pitches.

Fitness Classes

21 Fitness Classes a week with a majority full.

Further work towards NHS and rehabilitation classes is on going to support wider demographics.

Education Opportunities

A meeting with Swindon New College has been held and we are looking to set up the MSH as an alternative learning venue for them on vocational courses. I am also working towards a package of Home Schooling sessions that can be held across our facilities here, more to come as plans firm up.

Team

Interviews for a Part Time receptionist are being held next week, the role will have a focus on the Green Card scheme and I will look forward to the lucky worker getting up to speed then using the role to get out to doctor surgeries, community centres, high traffic areas and partner organisations to promote and drive the sign up of this scheme.

Operations

The assistant project manger will be leaving the SBC in 4 weeks so we are pushing very hard to get many of the outstanding snags done and very detailed handovers done.
